7. Institutional Values and Best Practices

7.1: Institutional Values and Social Responsibilities

7.1.2: The Institution has facilities and initiatives for

1. Alternate sources of energy and energy conservation measures
2. Management of the various types of degradable and non-degradable waste
3. Water conservation
4. Green campus initiatives
5. Disabled-friendly, barrier free environment

Response:

- B. 3 of the above

● Management of the various types of degradable and non-degradable waste

Solid Waste Management: Degradable and non-degradable solid waste are classified into their respective categories. Newspapers, magazines, files, dry tree leaves, raw culinary garbage (canteen, mess), and hostel waste are all examples of degradable waste. Glass, metals, and E-waste are examples of non-biodegradable garbage. Following collection, items are disposed of using the institute's adoption of the collection method established by the Pune Municipal Corporation.

Waste Water Management: The campus equipped with two 'Sewage Treatment Plant. Presently one is functional and one is under maintenance. During the maintenance time the sewage is connected to Municipal Drainage Lines. For the Annual Maintenance Contract (AMC) of the treatment plants assigned to external agency.

E-Waste Management: The NBNSTIC is established in 2011 with all new electronic gadgets and equipment. Presently, E-Waste started to generate. The Institute has establishing a procedure for the removal of E-waste and Scrap while keeping in mind the global dangers of electronic waste. Damaged batteries, cells, CDs, Hard Drives, Monitors, Keyboards, Cables, Cartridges, and other types of e-waste generated in the institution are collected. Every department has a designated spot for collecting e-waste, and students and staff are encouraged to discard any created e-waste there. The CDs that are no longer required are used as decorations by students at various college functions. The institute soon defining the policy for proper E-Waste Disposal.

● **Green campus initiatives**

The entire NBN STIC campus is carried up with a rich variety of trees and plants to keep the air free of carbon dioxide and to ensure good health. The campus is fully greener by the preservation of biodiversity, which includes landscapes with grass, bushes, trees, and ornamental trees. The internal Air Quality Index(AQI) of Campus is maximum 54 and minimum 45. The site is beautifully landscaped to add a feeling of elegance and environment.

● **Disabled-friendly, barrier free environment**

The NBN STIC has made the following accommodations for people with disabilities. In order to prevent the exclusion of disabled students, instructors, and staff from all facets of employment and education, an inclusive culture must be developed. This ensures that every person is qualified to participate in any specific academic institution or activity.

Encl.:

- a) Policy documents of the institution
- b) Geotagged photographs and videos of the facilities with captions.
- c) Bills for the purchase of equipment for the facilities created under this metric.
- d) Brief report of the facilities provided.
- e) Circulars, reports.
- f) Ramps /stairs/lift/wheelchair/signage board/restroom/ software should include specific requirements of Divyangjan for their use.

Dr. Shivprasad. P. Patil
Principal / Director

f. Ramp, Stairs, lift, wheel chair, restroom for Divyangjan students

- **Ramp:**

The ramps are adequately built and constructed specifically for usage by people with disabilities. A slope surface known a ramp is added to a set of steps. Ramps make it simpler for people pushing strollers, carts, or other items with wheels to enter a building and navigate between sections of various heights.

Fig. (A) Ramp Entry

Fig. (B) Ramp

- **Stairs:**

The Stairs are available for faculty members and students with mobility concerns, including those who use wheelchairs, walkers, canes, or anyone with balance problems. The steps on campus are accessible for those with disabilities, which can encourage independent living while lowering dangers and challenges inside

Fig. (C) Stairs

- **Lift:**

Elevators are designed to overcome obstacles, making it safe for wheelchair users to move about. We are confident that we can find a product to suit your demands, no matter where you are or what your budget is. Lifts have been erected to enable barrier-free access to the college building for students, staff, visitors, and individuals with disabilities.

Fig. (D) Lift

- **Wheelchair:**

By helping to prevent common issues like pressure sores, the advancement of deformities, and improving respiration and digestion, a suitable wheelchair improves the physical health and quality of life of its users. The wheelchair is the most common assistive devices for those who have trouble walking to boost mobility and enhance their quality of life.

Fig. (E) Wheel Chair

- **Restroom:**

There are bathrooms that have been specially designed to better suit those with physical restrictions. They are beneficial for those with limited mobility as well as those with weak legs because being able to stand up more easily is made possible by a taller toilet bowl. We have increased accessibility, facilities on campus, but there is still opportunity for improvement. More space, grab bars to make it simpler to transfer to and from the toilet seat, and extra space for a caregiver, when needed

Fig. (E) Restroom
